

Dear friends,

The CIO Forum of CSI Chennai & IEEE Computer Society, Madras Chapter join Hitachi Data Systems and Brocade in cordially inviting you to a seminar on "Data Resilience for Virtualized Environments"

The rapid adoption of server virtualization is changing the requirements for data center infrastructure capabilities and design. With more critical business applications moving to VMware and Hyper-V virtualized platforms, IT professionals need to ensure that the data generated in their VMware and Hyper-V environments is properly protected and secured. Equipped with the right toolset, you can leverage the inherent flexibility of your virtualized environments to extend much-needed protection to additional applications and data types. You can also build highly scalable, more predictable and cost effective disaster recovery solutions.

The data resilience solutions by Hitachi Data Systems allow you to mitigate risk to your critical business information through disaster planning, operational recovery, and data security. Further, it will help you develop a strategy while discussing the following:

- Hitachi Data Replication and Storage Technologies
- How to Optimize a Brocade Network for Server Virtualization
- Comprehensive Security Solutions for Data at Rest

This event at Chennai is scheduled on Wednesday, 26th May 2010 at Hotel Taj Connemara.

Programme:

09.30 - 10.00: Registration

10.00 - 10.15: Welcome & Introduction

10.15 - 11.00: Presentation by Thomas Liew, Data Network Alliance Manager,
