5.30 p.m.: Tea & Fellowship :: 6.00 p.m.: Presentation :: 7.30 p.m.: Dinner

About the Presentation: The speaker will present how attitudes towards Cyber Security have changed in the last few years in the minds of both corporate boards and government in the UK and USA. He will contextualize this to issues pertaining to India and will focus on cyber security breaches. He will share the UK experience to indicate what the UK did to bring this forward as a matter of national concern with the view of highlighting how this might happen in India also. He will be highlighting on the career options for graduates who have specialist cyber security education and experience. He will also touch on the ‘threat landscape’ to indicate how criminal cartels are operating in Europe to cause some of the biggest Cyber Security problems around the world. This would be of interest to us as the threat landscape in India has not yet matured.
