

IEEE Computer Society Madras Chapter joins with eWIT

in cordially inviting you to a Technical Session

on

Why API's rule the world?

by

Ms. Swaathi

Co-Founder, Skript

A young and passionate practitioner and
who has been acknowledged by Google Inc

on Wednesday, 24th February 2016 from 5 pm to 7.00 pm
at STPI Auditorium, No.5, Rajiv Gandhi Salai, Taramani, Chennai – 600113

About the talk: What's great about today is that we can start our work on a computer, pick it up on our phones, and proofread it on a smartwatch. Building interconnected services has become a prerequisite in today's interconnected world. However, managing these services does not always need to land you in spaghetti of mess. Building modular, scalable and secure API's is what will set you on a path of growth. The talk "Why API's rule the world" will introduce efficient API design, discuss key API concerns when it comes to scaling, and guide on how to run a API driven business model.

About the Speaker: Ms. Swaathi is the co-founder of Skript and serves as the VP of Products. Skript is the brains behind SHRINK, the best compression server for the enterprise. She is an avid open source developer and strongly believes in Women Who Code. She also co-runs Google Developers Group in Chennai

Program:

5:00 - Tea & Networking
5:30 - Welcome & Introduction
5:40 - Talk by Ms. Swaathi
